OUR improvement in 2025

17,500

Tons of carbon
emissions reduction

We've constructed the flue gas emission system with ultra-low emissions to achieve low carbon and emission reduction. We've also attained recycle utilization of raw material during production. We keep practicing the idea of sustainable development and create green, digital and smart factories. We target at boosting the industry's green development and leading a healthy lifestyle with high-quality green products. In 2016, Nabel brought in the world first-rate production line of sintered stone, including wide-body kiln imported from Italy. In 2017, the first set of sintered stone in China was born in Nabel, thus creating the era of sintered stone in China. In 2020, Nabel adopted the intelligent full-body 5.0 technology and launched the first set of full-body antibacterial sintered stone. We take inspirations from the nature and adopt the concept of artistic houses to keep expanding the application fields and boundaries of sintered stone, covering wall, floor, countertop and furniture finishes. Nabel committed to create more imaginative aesthetic spaces of sintered stone for our customer.

Nabel has led the industrial development through technical innovation and served as a pronoun of quality, beauty, green and environmental protection. We're willing to share the sintered stone aesthetics with everyone, jointly explore the strength of the nature and art, and provide a more comfortable spatial experience that is closer to the nature for our customers!

We are NABEL

Explore the strength of the nature and art, and design for the future!

Let great artists decorate your home.

Founded in 1992, NABEL is a renowned global leader in the specialized manufacture of Sintered Stone and Porcelain Tile. We has been dedicated to creating a healthy and high-quality life, focusing on pioneering premium, eco-friendly material. We provide unique, practical, and sustainable solutions for both indoor and outdoor spaces.

While consistently adhering to technical innovation and superior products, NABEL explores the strength of nature and art to offer customers a space experiences beyond expectations, leading the industry with continuous innovation. Currently, NABEL operates over 3,000 stores in more than 110 countries worldwide and nearly 10,000 partners, offering high-quality products and creating a wonderful life for our world together.

SPACE APPLICATION

Nabel sintered stone adopts Nabel patented formula, which has the characteristics of high density and hardness, and has super physical properties. In daily applications, it can withstand the temperature change of sudden cooling and heating, and has superior properties such as abrasion

resistance, scratch resistance, acid and alkali corrosion resistance, waterproof, antifouling. The surface is antibacterial and bacteriostatic, making it easier to clean.

8 PRODUCT
SERIES

The patterns of the sintered stone are selected from the world's precious stone patterns and natural textures, including sandstone and metal, and are rich in colors. While satisfying the integration and holistic application of the whole space, it also opens up visual enjoyment with high-end texture and natural aesthetics.

8 SURFACE TECHNOLOGIES

3D+ Surface

Nabel's 3D+ surface utilizes Nabel's globally pioneering 3D printing technology. By using a digital printer to simultaneously print multiple porcelain materials onto the same plane, it creates a 3D texture, generating a richer tactile and visual effect. Nabel has achieved superior 3D printing technology in the sintered stone field through multiple core patented technologies.

3D Surface

Nabel's 3D surface utilizes digital functional ink, combined with high-precision automatic alignment printing technology, to create a 3D effect on the surface, perfectly reproducing the texture and feel of natural stone. This not only significantly enhances visual and tactile sensations but also meets diverse design needs.

SUPER SOFT Surface

Nabel Super Soft Surface, using Nabel unique patented unglazed surface technology process, compared with the glazed surface, Nabel's Super Soft Surface feels more soft, warm and delicate, with higher abrasion characteristics.

SILK Surface

Nabel Silk Surface, using high temperature fine-grained grits as the surface material. After firing to form a uniform layer of particles, with excellent abrasion resistance, low water absorption and super stain resistance, the color reflects the aesthetics of the vegetarian spirit.

TEXTURE Surface

Nabel Texture Surface, using the digital inks, restores the natural stone veins, wood grain, fabric and other material surface texture, so that the product owns richer layers of detailed texture.

SLATE Surface

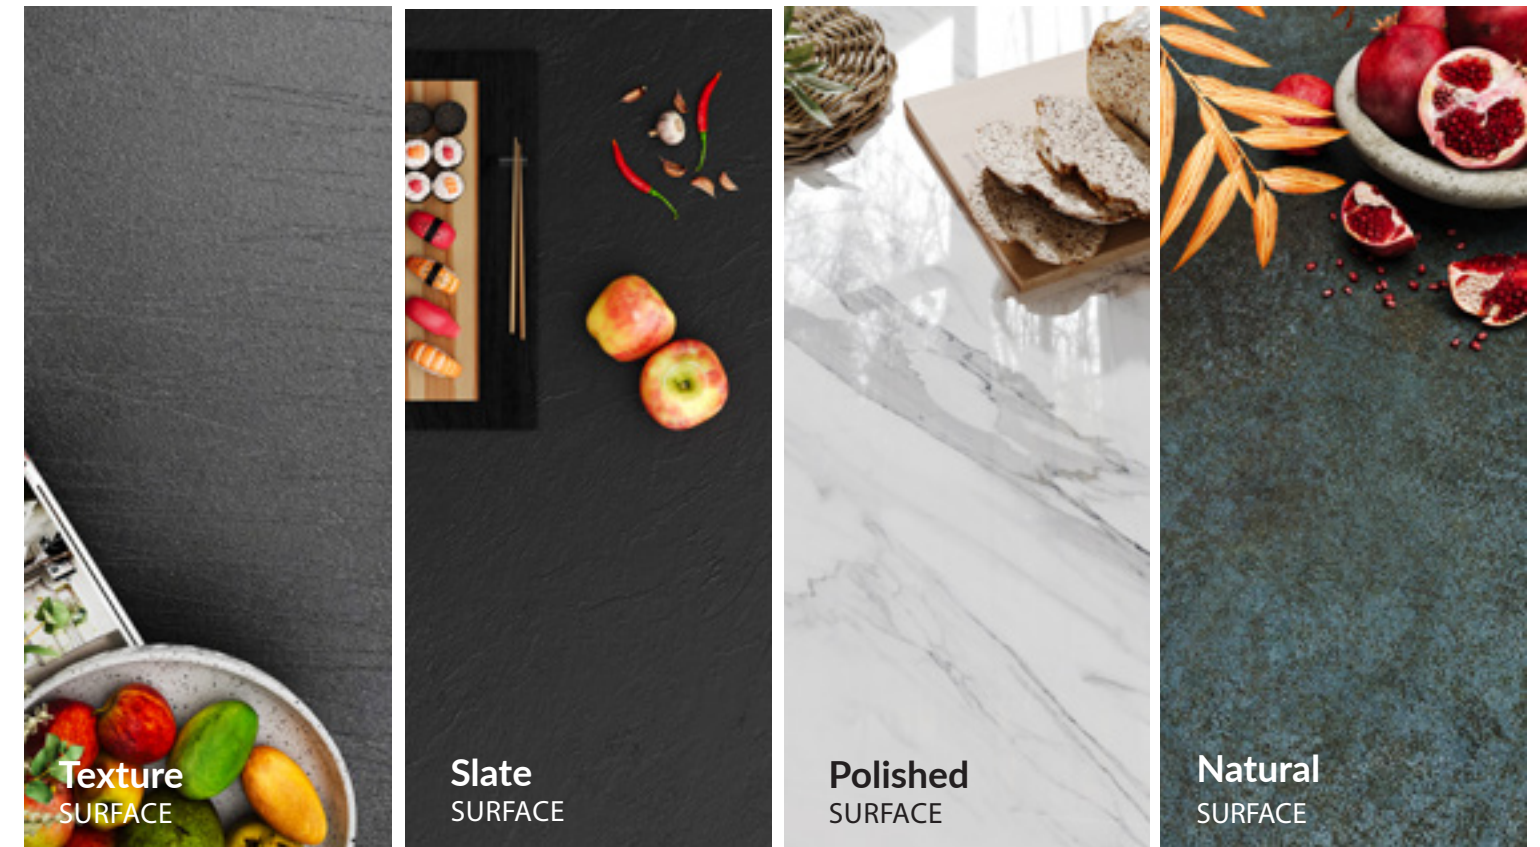

Nabel Slate Surface, using the carved belt mold, restores the natural stone texture, to bring the purest traces of nature to the product, so that people are immersed in feeling the precipitation of nature's years, touching the natural texture formed by the etching of nature for billions of years.

POLISHED Surface

Nabel Polished surface, using super abrasion resistant dry grain glaze to ensure the gloss presents the best visual effect, three-dimensional. So that the slab's surface texture are more transparent, richer layers, brighter colors, superior abrasion resistance.

NATURAL Surface

Nabel Natural Surface, using high temperature hard grits as the surface material. After firing to form a uniform layer of particles, with superior anti-slip performance and product hardness, safe and reliable.

WE PROTECT YOUR HEALTH

ANTIBACTERIAL

Suitable for use in all types of environments, especially places where bacteria are easy to breed. After adding the antibacterial material, cooking or barbecue can be realized between the surfaces of the Sintered stones. The moisture-proof and mildew-proof performance of board has better bacteriostatic effect than traditional board. Nabel Antibacterial Slabs help to eliminate the growth of bacteria such as Staphylococcus Aureus and Escherichia Coil.

TECHNICAL FEATURES

Easy to Clean And Maintain

Any dirt can be easily cleaned. Resistant to kinds of cleaning chemical agent, such as bleach.

Suitable For Touch With Foodstuffs

Does not contain any harmful substances and suitable for contact with food. Food can be directly placed on the surface of rock plate for treatment.

Resistant To High Temperatures

Non-flammable, high temperature resistant, and will not release any harmful substances at high temperature.

Super Abrasion And Scratch Resistance

High hardness, which makes it very difficult to be scratched and ground.

High UV Resistance

For it is 100% natural, its color will not fade when exposed to sunlight or other extreme weather conditions.

Low Water Absorption (Less Than 0.1%), Nonporous

High strength and good compactness, with an absorption level of almost zero.
